

Acura NSX Climate Control Removal Instructions

Raise the parking brake handle

With a screw driver lift the false bottom of the arm rest

Remove the 4 screws holding the arm rest.

Remove the armrest

Remove 1 screw

Pull the shift boot and chrome ring down and unscrew the shift knob

Lift the lid of the ashtray and remove the ashtray

Remove 2 screws

Very carefully remove the clock

Remove 2 screws

Release the 2 clips on the bottom side of the vent with a .015 inch feeler gauge. Be careful to not scratch the console fascia its not shown but protecting the fascia with a business card works well.

Picture of the bottom of the vent showing the clips

Remove 2 screws

Lift the console up and disconnect the Cigarette lighter and Aspirator fan connectors and remove the console. If you are removing the Aspirator fan for repair you can see it just behind the base of the threads of the shift lever. There are 2 screws holding it to the console you will need to remove to free it from the console

Remove the 4 screws holding the Climate Control Unit

Lift out and disconnect the 2 connectors for the CCU
